Subject Index
Volumes 27 and 28

A

Acetazolamide, enzymatic assay and, 28:159
Acetylcholine, endothelial layer removal and, 27:41
Adenylate cyclase, β-adrenoceptor, 28:107
Aerosols, 27:143
AF64A. *See* Ethylcholine mustard aziridinium ion
Airway epithelium, 28:29
Airway narrowing, 28:29
Airway smooth muscle, 28:29
Alpha-2 agonists, opioid rigidity, palpebral ptosis, and, 27:45
Alpha-adrenergic agonists, ciliary beat frequency and, 28:1
Alphabungarotoxin, neuromuscular blockade and, 27:129
Analgesia, stress-induced, 27:197
Anesthesia
  acute intermittent porphyria and isoflurane, 28:191
  local, 27:85
  rats and, 27:51
Anion transport, biliary organic, 27:7
Anti-inflammatory evaluation, papaya latex and, 28:15
Antiarrhythmic agents, epicardial His bundle recordings and in vivo, 27:191
Anticholinergics, urinary tract and, 27:119
Antiestrogens, cell proliferation and, 27:203
Antipyrine
  microdialysis and, 27:135
  microdialysis and 4-trimethylammonium, 28:129
  umbilical flow and placental transfer of, 113
Antispasmodics, urinary tract and, 27:119
Aorta, thoracic, endothelin-1 and, 28:35
Arteries
  hepatic, 27:17
  middle cerebral, neuroprotection and, 27:27
Assay, quantitative, basic fibroblast growth factor and, 28:9
Atrial natriuretic factor, right ventricular dimensions and, 28:73
Atrioventricular node, epicardial His bundle recordings and, 27:191
Autoradiography, quantitative, 209

B

Basic fibroblast growth factor, colorimetric assay and, 28:9
β-adrenoceptors, guinea-pig lung parenchyma and, 28:107
Bile fistula, 27:7
Biliary excretion, 27:7
Biliary glucose, 27:7
Biliary organic anion transport, 27:7
Biliary P_i, 27:7
Biliary protein, 27:7
Blood flow regulation, hepatic, 27:17
Blood perfusion, endothelin-1 and, 28:35
Blood pressure
  chronic measurement of, 28:99
  computerized measurement of, 27:233
  isolated mesenteric vascular-intestinal loop preparation characterization and, 27:59
Blood sampling, chronic, 28:79
Blood, whole, leukotriene B_4 assay in, 28:185
Blood-brain barrier integrity, microdialysis and, 28:129
Brain edema, cerebral infarction and, 27:1
Brain infarction, brain edema and, 27:1
Brain renin-angiotension system, 27:161
Brain temperature, cerebral ischemia and, 27:23

C

Ca^{2+} channel blockers, urinary tract and, 27:119
C5a, lysozyme release from human neutrophils and, 27:95
Caerulein, gallbladder emptying and, 27:107
Calcium, heat-stable enterotoxin and, 28:67
Carbamazepine, pharmacokinetics and neuropharmacokinetics and, 28:21
Carbamazepine-epoxide, 28:21
Cardiovascular system, monitoring, long-term, 28:99
Carrageenan, anti-inflammatory activity and, 28:15
Cartilage, proteoglycan-degrading metalloproteinases and, 27:101
Catheter natural frequency, 27:171
Catheterization, intrathecal, 27:177
Central venous pressure, right ventricle dimensions and, 28:73

Cerebral hypothermia, chlorpromazine and, 27:23
Cerebral ischemia
  brain temperature and, 27:23
  neuroprotective drug effects and, 27:27
Cerebrospinal fluid, carbamazepine and, 28:21
Chelator molecules, macrophage depletion and, 28:217
Chlorpromazine, cerebral hypothermia and, 27:23
Chromatography
  high-performance liquid, 28:185
  thin-layer, 28:113
Chronic sampling, carbamazepine and, 28:21
Cilia, xylometazoline and, 28:1
Ciliary beat frequency, 28:1
Clodronate, entrapment of, 27:185
Cocaine, local anesthesia and, 27:85
Computer analysis, blood pressure and, 27:233
Computer program, concentration-response relationship analysis by seemingly unrelated nonlinear regression technique, 28:209
Concentration, vancomycin, 28:57
Concentration-response curves, seemingly unrelated nonlinear regression technique and, 28:209
Cyclic GMP, heat-stable enterotoxin and, 28:67

D

d-Tubocurarine
  local anesthesia vs., 27:85
  urethral sphincter and, 28:85
Dantrolene, urethral sphincter and, 28:85
Data acquisition, endothelial cell function and, 28:49
Data analysis
  concentration-response relationship analysis by seemingly unrelated nonlinear regression technique, 28:209
  endothelial cell function and, 28:49
Decamethonium, local anesthesia vs., 27:85
Delayed alternation task, working memory estimation and, 28:45
Deoxycorticosterone acetate-sodium chloride, hypertension and, 27:161
Dermatotoxicity, in vitro, 27:71
Dialyzable reference for microdialysis, 27:135
Dihydrofolate reductase, activity assay for, 28:167
Dimension measurements, right ventricle, 28:73
3-(4,5-Dimethylthiazol-2-y1)-2,5-diphenyltetrazolium bromide, colorimetric assay for cell proliferation with, 28:9
Drug administration devices, 27:143
Dry powders, 27:143
Dual-perfused liver, 27:17

E

Edema, brain, 27:1
EDRF. *See* Endothelium-derived relaxing factor
Electrical stimulation, frog skin secretion collection by, 28:199
Electrocardiographic variable, sodium channel blockade and, 27:51
Electrocardiography, three-dimensional, 27:217
Electromyography, neuromuscular blockade and, 27:129
Electrophysiology, epicardial His bundle recordings, 27:191
Endothelial cells, bioassay of function in, 28:49
Endothelin-1, isolated rabbit thoracic aortae responses to, 28:35
Endothelium
  endothelial layer removal, 27:41
  venous, 28:149
  venous thrombosis and, 27:225
Endothelium-derived relaxing factor
  endothelial cell bioassay system and, 28:49
  endothelium-dependent vasodilatation and, 28:223
  intravascular ultrasound and, 28:143
  venous endothelium removal and, 28:149
Entrapment, clodronate and, 27:185
Enzymatic assay
  acetazolamide determination in human serum by, 28:159
  dihydrofolate reductase activity and, 28:167
Ethylcholine mustard aziridinium ion, working memory estimation and, 28:45
Ethylenediaminetetraacetic acid, macrophage depletion and, 28:217

F

Ferrochelatase, *N*-ethylprotoporphyrin regioisomer separation and, 28:113
Focal cerebral ischemia, neuroprotective drug effects and, 27:27
Frogs, dermal and glandular secretions from, 28:199

G

Gallbladder emptying, ultrasound and, 27:107
Gallbladder volume, ultrasound and, 27:107
Gastric damage assessment, 27:245
Glucose consumption, skin penetration models and, 27:71
Glucose, biliary, 27:7
Growth factor, basic fibroblast, 28:9
Guinea pig, epicardial His bundle recordings in, 27:191

H

Heart rate, chronic measurement of, 28:99
Heat stroke, animal models for, 28:119

Heat-stable enterotoxin, pharmacologic action of, 28:67
Heparin, basic fibroblast growth factor colorimetric assay with, 28:9
Hepatic artery, 27:17
Hepatic blood flow regulation, 27:17
His bundle, epicardial recordings of, 27:191
Histamine, vascular tone and protein leakage and, 28:91
5-HT-$_{1A}$ agonists, focal cerebral ischemia and, 27:27
Hydrogen peroxide, endothelium-dependent vasodilatation in intrarenal arterial network and, 28:223
Hydrolytic enzymes, papaya latex-induced inflammation and, 28:15
Hypertension
  deoxycorticosterone acetate-sodium chloride-induced, 27:161
  pulmonary, milrinone and, 28:201
Hyperthermia, animal models for heat stroke studies, 28:119
Hypothermia, cerebral, chlorpromazine and, 27:23

I
Incontinence, urinary, in vivo model for, 27:33
Infarction, brain, 27:1
Insulin secretion, pancreatic islet incubation and perifusion, 28:181
Intrathecal catheterization, 27:177
Intrinsic efficacy, agonists', 28:107
IP_3 binding proteins, 27:79
Ischemia, cerebral
  brain temperature and, 27:23
  neuroprotective drug effects and, 27:27
Isoflurane, acute intermittent porphyria and, 28:191

K
K^+ channel openers, urinary tract and, 27:119
KCl, spasmolytics and urinary bladder with topically applied, 27:33
Kidney, endothelium-dependent vasodilatation in intrarenal arterial network, 28:223

L
L-NAME. *See* L-N^G-nitro-arginine methyl ester
L-N^G-nitro-arginine methyl ester, intravascular ultrasound and, 28:143
Left ventricular pressure, measurement of, 27:171
Leukotriene B_4
  human whole blood assay for, 28:185
  lysozyme release from human neutrophils and, 27:95
Lidocaine, local anesthesia and, 27:85
Lipophilicity, opioid, 27:67
Liposomes
  clodronate entrapment and, 27:185
  macrophage depletion and, 28:217
Liver
  dual-perfused, 27:17
  microsomes, 27:79
  perfused rabbit, 27:17
Lung function tests, 27:143
Lung parenchyma, guinea-pig, 28:107
Lung strip, 28:107

M
Macrophages
  clodronate entrapment and, 27:185
  liposome-delivered Ca^{2+} chelators and, 28:217
MCF-7 cells, antiestrogens and, 27:203
Mesenteric vascular bed, endothelial layer removal in, 27:41
Mesentery, isolated rat mesenteric vascular-intestinal loop preparation characterization, 27:59
Methacholine, airway reactivity and, 28:29
Methotrexate, dihydrofolate reductase activity and, 28:167
Mice, working memory estimation of, 28:45
Microcirculation, reflectance spectrophotometry and skin, 28:175
Microcomputer, three-dimensional electrocardiography and, 27:217
Microdialysis
  antipyrine and, 27:135
  blood-brain barrier integrity during, 28:129
  dialyzable reference for, 27:135
Micturition physiology, 28:85
Micturition reflex, pharmacologic evaluation and, 27:119
Milrinone, pulmonary hypertension and, 28:201
Monitoring, long-term, 28:99
Morphine, tail-flick test and, 27:197
Mouse
  cerebral infarction in, 27:1
  cerebral ischemia and neuroprotection in, 27:27
  neuromuscular blockade in, 27:129
MTT. *See 3-(4,5-Dimethylthiazol-2-y1)-2,5-diphenyltetrazolium*
Muramidase, lysozyme release from human neutrophils and, 27:95

N
N-ethylprotoporphyrin, regioisomer separation from, 29:113
Nasal epithelium, ciliary beat frequency of human, 28:1
Neuromuscular blockade, local anesthesia vs., 27:85
Neuromuscular blocking agents, evalution of, 27:129

Neuropharmacokinetics, carbamazepine, 28:21
Neuroprotection, cerebral ischemia and, 27:27
Neurotransmitters, isolated rat mesenteric vascular-intestinal loop preparation characterization and, 27:59
Neutrophils, lysozyme release from human, 27:95
Nitric oxide, endothelium-derived relaxing factor vs., 28:223
Nitrocellulose blot overlay, IP_3 binding protein identification by, 27:79
NMDA antagonists, focal cerebral ischemia and, 27:27
Nociceptive stimulus intensity, 27:197
Nonradionuclide blood-brain barrier marker, microdialysis and, 28:129
Nonsteroidal anti-inflammatory agents, 27:245
Noradrenaline, hepatic blood flow regulation and, 27:17
Norepinephrine
  endothelial removal and, 27:41
  isolated rate mesenteric vascular-intestinal loop preparation characterization and, 27:59
  small blood vessels with short stimulation trains and release of, 28:137

O
Octanol-water partition coefficient, 27:67
Opioids
  lipophilicity of, 27:67
  receptor binding, 27:67
  rigidity, alpha-2 assay reversal of, 27:45

P
Palpebral ptosis, alpha-2 assay reversal of, 27:45
Pancreatic islets, incubation and perifusion of, 28:181
Papaya latex, anti-inflammatory activity and, 28:15
Paroxetine binding, autoradiography of, 27:209
Peptides, formyl, 27:95
Perfused blood vessels, norepinephrine release and, 28:137
Perfused bronchial segments, 28:29
pH, vancomycin and plasma, 28:57
Pharmacokinetics
  carbamazepine, 28:21
  umbilical flow and placental transfer, 27:113
Phosphatidylinositol, heat-stable enterotoxin and, 28:67
Phosphodiesterase inhibitor, pulmonary hypertension and, 28:201
Photochemical injury, cerebral infarction and, 27:1
Pig, isolated blood-perfused pig ear, 27:71
Placental cotyledon, human, 28:61
Placental metabolism, 28:61
Placental perfusion techniques, 28:61
Placental transfer, umbilical flow rates and, 27:113
Plasma catecholamines, tail-artery cannulation and, 28:79
Plasma prolactin, tail-artery cannulation and, 28:79
Platelet-activating factor, lysozyme release from human neutrophils and, 27:95
Plethysmography, 27:143
Polarcardiography, 27:217
Polypeptides, frog skin secretion collection and, 28:199
Porcine skin, skin penetration studies with, 27:71
Porphyria, acute intermittent, isoflurance and, 28:191
Portal vein, 27:17
Powders, dry, 27:143
Procaine, local anesthesia and, 27:85
Propranolol, local anesthesia and, 27:85
Proteases, proteoglycan-degrading metalloproteinase inhibitor screening, 27:101
Protein binding, vancomycin and, 28:57
Protein kinase, heat-stable enterotoxin and, 28:67
Protein, biliary, 27:7
Proteoglycans, proteoglycan-degrading metalloproteinase inhibitor screening, 27:101
Pulmonary extravascular water, milrinone and, 28:201
Pulmonary vasodilation, milrinone and, 28:201

Q
Quinacrine, local anesthesia and, 27:85
Quinidine, local anesthesia and, 27:85

R
Rabbit
  isolated rabbit thoracic aortae and endothelin-1, 28:35
  microsonometry in, 28:73
  perfused liver, 27:17
  umbilical flow and placental transfer in, 27:113
Radical scavengers, focal cerebral ischemia and, 27:27
Radioimmunoassay, leukotriene B_4 in human whole blood and, 28:185
Radioligand binding, 28:107
Radiotelemetry, blood pressure and heart rate measurement with, 28:99
Rats
  anti-inflammatory evaluation and, 28:15
  conscious, 27:171
  deoxycorticosterone acetate-sodium chloride hypertension and, 27:161
  freely behaving model, 28:21
  skin microcirculation and reflectance spectrophotometry in, 28:175
  tail-artery cannulation method and, 28:79
  three-dimensional electrocardiography in, 27:217
  unanesthetised, 27:119
  unrestrained, 28:99

Rat tail artery, norepinephrine release and, 28:137
Recombinant tissue factor pathway inhibitor, 27:225
Regioisomers, *N*-ethylproporphyrin, 28:113
Respiratory mechanics, 27:143
Right ventricle, microsonometry and, 28:73
RSh segment, sodium channel blockade and electrocardiographic, 27:51

S
Seemingly unrelated nonlinear regression technique, concentration-response relationships analysis by, 28:209
Serotonin uptake, paroxetine binding and, 27:209
Serum
  acetazolamide in human, 28:159
  pancreatic islet incubation and perifusion, 28:181
Sheep, chronic intrathecal catheterization in, 27:177
Signal transduction, IP_3 binding proteins and, 27:79
Skin
  reflectance spectrophotometry and microcirculation of, 28:175
  release and collection of frog skin secretion, 28:199
  skin penetration models, 27:71
Sodium channel blockers, 27:51
Spasmolytics, urinary bladder and, 27:33
Spectrophotometry, microcirculation of skin and reflectance, 28:175
Spontaneous learning, working memory estimation and, 28:45
Spreadsheet, endothelial cell function and, 28:49
Starling pneumatic resistance set, 28:35
Stasis, venous thrombosis and, 27:225
Steroids, dictionary of, 27:127
Striated and smooth muscle sphincters, drug activity on urinary bladder, 28:85
Succinylcholine, local anesthesia vs., 27:85
Sympathetic nerves, striated and smooth muscle sphincters and, 28:85
Synovial vasculature, 28:91

T
Tail-artery cannulation, blood parameters and, 28:79
Tail-flick test, analgesia and, 27:197
Tamoxifen, MCF-7 breast cancer cells and, 27:203
Temperature measurement, heat stroke studies and, 28:119
Temperature, brain, 27:23
Theophylline, umbilical flow and placental transfer of, 27:113
Thoracic aorta, endothelin-1 and, 28:35
Thrombosis, venous, 27:225
Tissue factor, 27:225
Transhepatic signal transfer, 27:17
4-Trimethylammonium antipyrine, microdialysis and, 28:129

U
Ultrasound
  gallbladder volume and, 27:107
  intravascular, 28:143
Umbilical flow, placental transfer and, 27:113
Urinary bladder, spasmolytics and rat, 27:33

V
Vancomycin, protein binding of, 28:57
Vascular leakage, monitoring of synovial, 28:91
Vascular smooth muscle, endothelium-dependent vasodilatation in intrarenal arterial network and, 28:223
Vascular tone, monitoring of synovial, 28:91
Vasomotor tone, intravascular ultrasound and, 28:143
Vectorcardiography, 27:217
Vena cava, venous thrombosis and, 27:225

W
Working memory, T-maze method for estimating, 28:45

X
Xylometazoline, ciliary beat frequency and, 28:1
